Popsicle House

Tag us in your photos @atxrestore and @smtxrestore

For this house,
you'll need:

Around 100
popsicle sticks

Brown paper or
something to protect
your work area

Hot glue or craft
glue (kids should
be supervised)

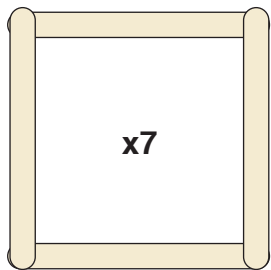

Scissors

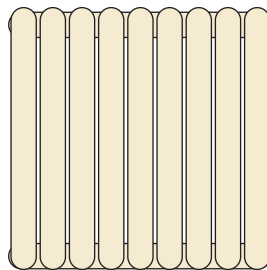

Utility knife

1

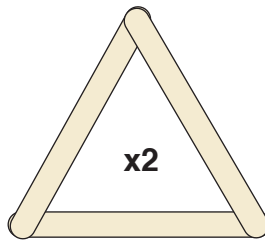

Make 7 squares with
popsicle sticks glued at
corners, 4 for the walls
and 3 for the roof.

2

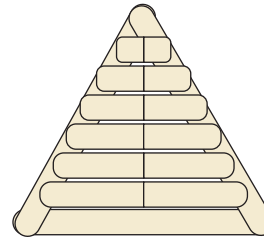

Glue popsicle sticks
to cover the 4 wall frames
and 3 roof panels.

3

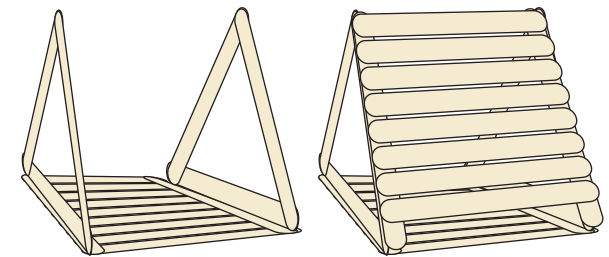

Make 2 triangles
with popsicle sticks
glued at corners.

4

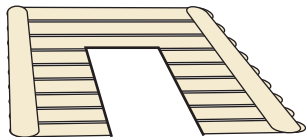

Glue popsicle sticks
to cover both panels.
Trim sticks with knife
as needed.

5

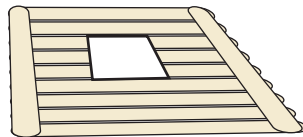

Assemble the roof, gluing 1 square
panel to each side as shown.

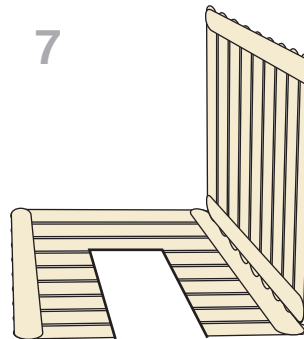

6

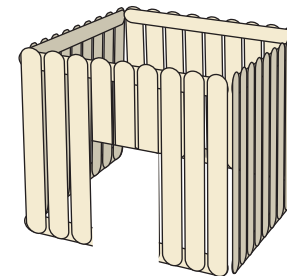

Using the knife, cut windows and door into
remaining wall panels as desired.

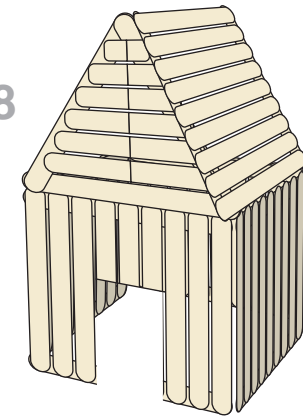

7

Then, assemble the house walls by gluing
the 4 walls together at right angles.

8

Finally, glue the roof onto the base of
the house and then decorate as you like
with paint, pictures, glitter... whatever!
